

ePortal

Learning Tomorrow's Way Today

Runcorn High School has developed a unique ePortal. This is an interactive digital library which allows students to access learning notes, resources, references, assessment tasks, revision exercises and engage in interactions with other students and teachers using the internet.

It really is Learning Anywhere Anytime.

Lost assignment sheets, handouts, confusion over homework tasks, printing problems are all things of the past as students use the latest technology to access and submit school work.

It's engaging for this generation of learners.

It's great preparation for the digital learning experiences at universities and colleges.

Students can also assemble their own digital portfolio of work

It helps our teachers assemble quality learning materials and experiences for our students.
